SolarWinds Products

Network Management	
Network Performance Monitor	Reduce network outages and improve performance with advanced network monitoring software
Network Bandwidth Analyzer Pack	Comprehensive network bandwidth analysis and performance monitoring. Includes: Network Performance Monitor NetFlow Traffic Analyzer.
NetFlow Traffic Analyzer	Network traffic analyzer and bandwidth monitoring software
Network Configuration Manager	Automated network configuration and compliance management
Network Automation Manager	Network automation & management software for on-premises, cloud, and hybrid environments. Includes: Performance, traffic, and bandwidth monitoring; Automated config, change, and IP address management; and High availability
Network Operations Manager	Integrated network management software for on-premises, cloud, and hybrid IT. Includes: Performance monitoring and troubleshooting; traffic and bandwidth analysis; and switch port monitoring and device tracking.
IP Control Bundle	Say goodbye to spreadsheets and hello to improved network reliability and control. Includes: IP Address Manager and User Device Tracker
IP Address Manager	Save time and prevent costly errors with affordable, easy-to-use IP address management software
User Device Tracker	Locate users and devices on your network with User Device Tracker
VoIP & Network Quality Manager	Deep dive into critical call QoS metrics and WAN performance insights
Log & Event Manager	Log management software for security, compliance, and troubleshooting
Engineer's Toolset	Over 60 must-have network management and troubleshooting tools
Network Topology Mapper	Automatically plot your network in minutes with network mapping software
Kiwi CatTools	Powerful network automation and configuration management software

Kiwi Syslog Server	Centralize and simplify log message management across network devices and servers
Systems Management	
Server & Application Monitor	Find and resolve application problems before they become incidents
Virtualization Manager	Optimize performance and fix vSphere and Hyper-V issues in minutes
Storage Resource Monitor	Multi-vendor storage performance and capacity monitoring
SolarWinds Backup	Modern, reliable server backup, without the cost and complexity
Web Performance Monitor	Comprehensive web and SaaS application performance monitoring
Systems Management Bundle	Complete systems monitoring built on the Orion Platform
Application Performance Optimization Pack	Full-stack application, database, virtualization, and server performance optimization Log & Event Manager makes it easy to use logs for security, compliance, and troubleshooting
IT Security	
Security Information and Event Management	Log & Event Manager makes it easy to use logs for security, compliance, and troubleshooting
Patch Manager	Intuitive patch management software for quickly addressing software vulnerabilities
Network Configuration Manager	Automated network configuration and compliance management
Serv-U Managed File Transfer Server	Enhance security and control over file transfers in and outside your organization
Serv-U FTP Server	Simple, affordable, easy-to-use FTP server software
User Device Tracker	Locate users and devices on your network with User Device Tracker
Cloud	

Application & Infrastructure Monitoring (AppOptics)	Application and infrastructure monitoring. Application Performance Monitoring: Trace and visualize application bottlenecks; Server and Infrastructure Monitoring: Your key metrics in real-time dashboards; Custom Metrics and Analytics: Get amazing application, infrastructure, and business insights.
Hosted Log Management (Papertrail)	Cloud-hosted log management. Get instant log visibility across your systems - simple to set up and easy-to-use; Troubleshoot with full text search; tail, interpret and act on real-time log streams; Analyze, create data streams, manage events, and get alerts from saved searches. Identify patterns and anomalies using log velocity analytics.
Website Uptime & Performance (Pingdom)	Web performance management. Test your websites or web apps every minute from locations all over the world utilizing uptime monitoring; Continuously enhance the users' digital experience on your website with visitor insights; Track your website's load time and find bottlenecks with page speed monitoring.
Hosted Log Monitoring & Analytics (Loggly)	Cloud-hosted log monitoring and log analytics. Aggregate, structure, and summarize your log data; Analyze and visualize your log data with interactive dashboards, advanced log correlation, and an anomaly detection capability; Monitor app performance, system behavior, and suspicious activity across the stack.
IT Help Desk	
Web Help Desk	Affordable Help Desk Ticketing and Asset Management Software
Dameware Remote Support	Remote control and systems management tools in one easy-to-use package
Dameware Mini Remote Control	Affordable remote control software for all your customer support and help desk needs.
Help Desk Essentials	Save time, money, and resources by automating and simplifying help desk and IT support tasks. Includes: Dameware Remote Support and Web Help Desk
Mobile Admin	Simplify IT administration and management from your mobile device

Database Management	
Database Performance Analyzer	Comprehensive view of how every aspect of the system affects performance across relational database operations, host server and OS, virtualization resources and storage I/O. Quickly find bottlenecks and troubleshoot complex database performance problems.
Server & Application Monitor	Find and resolve application problems before they become incidents
Storage Resource Monitor	Multi-vendor storage performance and capacity monitoring
